PROFILE SUMMARY

Senior Frontend Engineer with 6+ years of experience crafting intuitive, visually refined, and high-performance web interfaces. Led UI/UX direction at both TEKLOGIX and TechnoCares, owning the full design-to-development pipeline: from wireframes and design systems through to pixel-perfect implementation. Experienced in bilingual (Arabic/English) RTL/LTR interfaces across international platforms. Deep expertise in component architecture, interaction design, animation, and responsive layouts across enterprise SaaS, marketplaces, and insurance platforms. Proficient in Angular (v2-20) with strong hands-on experience across the full frontend stack. Early adopter of AI-augmented engineering; using Claude Code, Figma Make, Stitch, and Loveable to accelerate delivery, and building multi-agent orchestration pipelines that achieve 100% output at a fraction of traditional team cost.

KEY COMPETENCIES / SKILLS

Frameworks:	Angular 2-20, TypeScript, JavaScript
Styling:	Tailwind CSS, SCSS/SASS, Bootstrap, PrimeFlex
UI Libraries:	PrimeNG, Tailormade
Design Tools:	Figma, Figma Make, Stitch, Loveable, Claude Design
AI / ML:	Claude Code, GLM, Multi-Agent Orchestration, Prompt Engineering
AI Workflow:	Few-Shot Prompting, Chain-of-Thought, Skill Engineering, Agent Evaluation
Other Tools:	Puppeteer, GSAP, Lottie, Swiper.js, HTML5, CSS3
Languages:	Urdu (Native), English (Professional)

AI ENGINEERING & AGENTIC SYSTEMS

- Contributed to a multi-agent CLI pipeline built on Claude Code, used daily to automate code review, documentation generation, brownfield codebase exploration, and business workflows.
- Worked on a skills-based agent system with dedicated prompts per agent, covering agent routing, inter-agent state passing, and failure/retry logic.
- Applied prompt engineering techniques including system prompt versioning, few-shot examples, role-based prompting, chain-of-thought, and structured output formatting across specialised agents.
- Experienced with snowball orchestration where a main orchestrator collects and routes context to specialised subagents.
- Authored custom skill definition files encoding frontend domain knowledge for AI agents, enabling repeatable high-quality output.
- Leverages Figma Make, Stitch, Loveable, and Claude Design to generate complete UI designs and convert them directly into production-ready code within minutes; what previously took days of manual design and development is now achieved end-to-end through AI-assisted pipelines, from visual concept to fully functional, responsive components.

PROFESSIONAL EXPERIENCE

TEKLOGIX

2023 - 2026

UI/UX Lead & Senior Frontend Developer

- Led all UI/UX decisions across products, owning design systems, interaction patterns, and visual consistency from concept through delivery.
- Architected the frontend of **Alpha Klaus**, an enterprise SaaS CRM, including a fully customisable widget-based layout engine with dynamic data providers and master-detail patterns.
- Built **Pfoten Versichert** (pet insurance platform) and **kinderleicht Versichert** (children's insurance site), both featuring advanced animations (GSAP, Lottie), interactive pricing UIs, and mobile-first responsive design.
- Integrated Claude Code and AI-assisted development workflows; designed skill files and multi-agent pipelines achieving full project delivery output.
- Mentored junior developers and established frontend coding standards and component library best practices.

- Served as UI/UX lead, translating product requirements into cohesive, user-centred interfaces across all company products.
- Built **DOOZ**, a bilingual (Arabic/English) automotive marketplace with car listings, insurance, financing, and warranty services.
- Developed **JOClaims**, an end-to-end accident management platform covering claim creation through workshop repair and parts procurement.
- Delivered **AutoScore**, a bilingual car inspection platform across Jordan and Syria with 200-point inspection reports and verified showroom integrations.
- Designed and implemented the company's public website, handling UI/UX and full frontend build.

KEY PROJECTS

A selection of key projects from my career. I have contributed to numerous other products across various industries beyond those listed here.

ALPHA KLAUS

2023 - 2026 | TEKLOGIX

[Angular 20](#), [TypeScript](#), [PrimeNG](#), [PrimeFlex](#), [Tailwind CSS](#), [SCSS](#)

- Enterprise SaaS platform covering CRM, billing, contracts, and workflow management.
- Designed and built a fully customisable widget-based UI system with dynamic layouts, configurable data providers, and master-detail patterns adaptable to any business context.

PFOTEN VERSICHERT: Pet Insurance Broker

2025

[JavaScript](#), [Tailwind CSS](#), [GSAP](#), [Swiper.js](#), [Lottie](#), [Puppeteer](#)

- Pet insurance comparison platform with expert consultation booking and policy management.
- Built highly animated, responsive UI with GSAP scroll effects, Lottie illustrations, and Swiper-powered carousels.

KINDERLEICHT VERSICHERT: Children's Insurance

2025

[JavaScript](#), [Tailwind CSS](#), [Lottie Web](#), [HTML5](#), [CSS3](#)

- German insurance broker for children's plans with an interactive real-time pricing slider and instant cost updates.
- Animated mascot characters using Lottie; mobile-first design with smooth transitions throughout.

360 BUSINESS PAGES

2023 - 2024

[Angular](#), [TypeScript](#), [PrimeNG](#), [Bootstrap](#), [Figma](#)

- Canadian multi-directional marketplace for the trucking industry: buy and sell trucks and parts, register your business, post and apply for trucking jobs, all in one platform.

DOOZ: Automotive Marketplace

2020 - 2023 | TechnoCares

[Angular](#), [TypeScript](#), [Bootstrap](#), [SCSS](#)

- Full-featured bilingual (Arabic/English) marketplace for car buying, selling, insurance, financing, and warranties.
- Led UI/UX design and frontend implementation; handled RTL/LTR layout switching and bilingual UX patterns.

AUTOSCORE: Car Inspection Platform

2022 | TechnoCares

[Angular](#), [Bootstrap](#), [SCSS](#), [JavaScript](#)

- Bilingual (Arabic/English) vehicle inspection booking platform operating across Jordan and Syria.
- Users book inspections and receive detailed 200-point inspection reports; integrated with verified showrooms and accredited banks.

JOCLAIMS: Accident Management Platform

2020 - 2022 | TechnoCares

[Angular](#), [TypeScript](#), [Bootstrap](#), [HTML](#), [SCSS](#), [JavaScript](#)

- End-to-end vehicle accident management: from claim creation through workshop repair assignment to spare parts procurement.
- Photo-upload-driven workflow; designed intuitive multi-step UI for complex insurance processes.

EDUCATION

COMSATS University, Lahore
BSc Computer Science

2016 - 2020
