PROFILE SUMMARY

Senior Frontend Engineer with 6+ years of experience crafting intuitive, visually refined, and high performance web interfaces. Led UI/UX direction at both TEKLOGIX and TechnoCares, owning the full design to development pipeline: from wireframes and design systems through to pixel perfect implementation. Experienced in bilingual (Arabic/English) RTL/LTR interfaces across international platforms. Deep expertise in component architecture, interaction design, animation, and responsive layouts across enterprise SaaS, marketplaces, and insurance platforms. Proficient in Angular (v2-20) with strong hands on experience across the full frontend stack. Early adopter of AI augmented engineering; using Claude Code, Figma Make, Stitch, and Loveable to accelerate delivery, and building multi agent orchestration pipelines that deliver complete production websites, from research and design through content, imagery, QA, and compliance, in days instead of weeks at a fraction of traditional team cost.

KEY COMPETENCIES / SKILLS

Frameworks:	Angular 2-20, TypeScript, JavaScript, HTML5
Styling:	Tailwind CSS, SCSS/SASS, Bootstrap, PrimeFlex, CSS3
UI Libraries:	PrimeNG, Tailormade
Design Tools:	Figma, Figma Make, Stitch, Loveable, Claude Design
AI / ML:	Claude Code, GLM, Multi Agent Orchestration, Diffusion Models (FLUX), Local Image Generation (mflux, diffusers/CUDA), MCP, Playwright
AI Workflow:	Few Shot Prompting, Chain of Thought, Skill Engineering, AI Guardrails
Other Tools:	GSAP, Lottie, Swiper.js
Languages:	Urdu (Native), English (Professional)

AI ENGINEERING & AGENTIC SYSTEMS

- **Multi Agent CLI Pipeline:** Contributed to a multi agent CLI pipeline built on Claude Code, used daily to automate code review, documentation generation, brownfield codebase exploration, and business workflows.
- **Skills Based Agent System:** Worked on a skills based agent system with dedicated prompts per agent, covering agent routing, inter agent state passing, and failure/retry logic.
- **Prompt Engineering:** Applied techniques including system prompt versioning, few shot examples, role based prompting, chain of thought, and structured output formatting across specialised agents.
- **Snowball Orchestration:** Experienced with a main orchestrator that collects and routes context to specialised subagents.
- **Custom Skill Files:** Authored custom skill definition files encoding frontend domain knowledge for AI agents, enabling repeatable high quality output.
- **AI Design to Code:** Leverages Figma Make, Stitch, Loveable, and Claude Design to generate complete UI designs and convert them directly into production ready code within minutes; what previously took days of manual design and development is now achieved end to end through AI assisted pipelines, from visual concept to fully functional, responsive components.
- **Autonomous Website Pipeline:** Built and operated a 10 phase autonomous website production pipeline orchestrating 20+ specialised Claude agents (research, design, content, imagery, build, testing, SEO, accessibility, compliance) that ships production ready websites end to end.

- **Local Diffusion Image Pipeline:** Built local diffusion model image pipelines (FLUX via mflux on Apple Silicon, diffusers + CUDA on Windows) generating all website visuals on device, with negative prompt engineering, style consistency prompting, and automated anatomy QA.
- **AI Content Guardrails:** Deterministic post processing to remove "AI tells" from generated copy, Zod schemas as the contract layer for structured agent output, and an automated compliance agent that lints AI generated content against advertising law before deploy.

PROFESSIONAL EXPERIENCE

TEKLOGIX

2023 - PRESENT

Senior Frontend Developer & UI/UX Lead

- Worked as Senior Frontend Engineer, building and architecting product interfaces, while in parallel leading UI/UX decisions across products, owning design systems, interaction patterns, and visual consistency from concept through delivery.
- Designed the UI architecture of Alpha Klaus, an enterprise SaaS CRM, defining the design system, component library usage, and a fully customisable widget based interface with dynamic data views and master detail patterns.
- Built Pforten Versichert (pet insurance platform) and kinderleicht Versichert (children's insurance site), both featuring advanced animations (GSAP, Lottie), interactive pricing UIs, and mobile first responsive design.
- Spearheaded the company's shift to agentic AI development with alpha.web, an automated Claude Code pipeline that takes a website from concept to launch ready in days.
- Defined the standards that make AI output production safe: reusable agent skill definitions, automated review gates, and content checks covering legal compliance, copy quality, and on device visual asset generation.
- Mentored junior developers and established frontend coding standards and component library best practices.

TechnoCares

2020 - 2023

Frontend Developer & UI/UX Lead

- Served as Frontend Engineer, translating product requirements into cohesive, user centred interfaces across all company products, while also leading the UI/UX department.
- Built DOOZ, a bilingual (Arabic/English) automotive marketplace with car listings, insurance, financing, and warranty services.
- Developed JOClaims, an end to end accident management platform covering claim creation through workshop repair and parts procurement.
- Delivered AutoScore, a bilingual car inspection platform across Jordan and Syria with 200 point inspection reports and verified showroom integrations.
- Designed and implemented the company's public website, handling UI/UX and full frontend build.

KEY PROJECTS

A selection of key projects from my career. I have contributed to numerous other products across various industries beyond those listed here.

ALPHA.WEB: AI Website Production Platform

2025 - PRESENT | TEKLOGIX

Claude Code, Multi Agent Pipeline, Astro, TypeScript, Tailwind CSS, FLUX, Playwright, Zod

- Monorepo platform that produces complete, SEO optimized insurance websites for the German market through an autonomous AI pipeline; specialised agents and skill files handle research, design, content, imagery, build, testing, and legal compliance.
- Human in the loop by design: every site passes automated quality gates and a UX review before delivery.

ALPHA KLAUS

2023 - PRESENT | TEKLOGIX

Angular 20, TypeScript, PrimeNG, PrimeFlex, Tailwind CSS, SCSS, Claude Code, Multi Agent Pipeline, Playwright

- Enterprise SaaS platform covering CRM, billing, contracts, and workflow management.

- Designed and built a fully customisable widget based UI system with dynamic layouts, configurable data providers, and master detail patterns adaptable to any business context.

PFOTEN VERSICHERT: Pet Insurance Broker

2025

JavaScript, Tailwind CSS, GSAP, Swiper.js, Lottie, Puppeteer

- Pet insurance comparison platform with expert consultation booking and policy management.
- Built highly animated, responsive UI with GSAP scroll effects, Lottie illustrations, and Swiper powered carousels.

KINDERLEICHT VERSICHERT: Children's Insurance

2025

JavaScript, Tailwind CSS, Lottie Web, HTML5, CSS3

- German insurance broker for children's plans with an interactive real time pricing slider and instant cost updates.
- Animated mascot characters using Lottie; mobile first design with smooth transitions throughout.

360 BUSINESS PAGES

2023 - 2024

Angular, TypeScript, PrimeNG, Bootstrap, Figma

- Canadian multi directional marketplace for the trucking industry: buy and sell trucks and parts, register your business, post and apply for trucking jobs, all in one platform.

DOOZ: Automotive Marketplace

2020 - 2023 | TechnoCares

Angular, TypeScript, Bootstrap, SCSS

- Full featured bilingual (Arabic/English) marketplace for car buying, selling, insurance, financing, and warranties.
- Led UI/UX design and frontend implementation; handled RTL/LTR layout switching and bilingual UX patterns.

AUTOSCORE: Car Inspection Platform

2022 | TechnoCares

Angular, Bootstrap, SCSS, JavaScript

- Bilingual (Arabic/English) vehicle inspection booking platform operating across Jordan and Syria.
- Users book inspections and receive detailed 200 point inspection reports; integrated with verified showrooms and accredited banks.

JOCLAIMS: Accident Management Platform

2020 - 2022 | TechnoCares

Angular, TypeScript, Bootstrap, HTML, SCSS, JavaScript

- End to end vehicle accident management: from claim creation through workshop repair assignment to spare parts procurement.
- Photo upload driven workflow; designed intuitive multi step UI for complex insurance processes.

EDUCATION

COMSATS University, Lahore

2016 - 2020

BSc Computer Science
